2.4 GHZ. Radio Controlled RC Supersonic Hero **User Guide**

Read Instruction Before Use.

Important: Read instructions completely before use. Keep guide for future reference.

INTRODUCTION

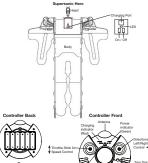

The Supersonic Hero is a 17" compressed foam flying toy that comes completely assemble from the box. Perfecting the power-to-weight balance ratio, along with its custom glider wing design, the Supersonic Hero achieves amazing manuscreatibity for an Ultimate RC Pyling experience.

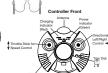

With an easy, toss-to-launch sequence, the Supersonic Hero is incredibly easy to control and fly even for any first timer It's also ideal for group flying! The Supersonic Hero works on a 2.4GHz bandwidth, which allows a maximum of 16 simultaneous devices to work within the same air space and is able to fly on an extended range of more than 200 feet.

With smart engineering tweeks, the propeller is designed and positioned in such a way to allow for balance flight while prolonging flight time. Supersoric Hero comes installed with a rechargeable fifthum polymer battery, capable of achieving an approximate flight time of leve to six misutes.

Please make sure you are constantly aware of your personal safety and other

GETTING STARTED

Battery Installation

Charging - a good charge for a good flight

- Ensure power switch is at the OFF position on the Supersonic Hero.
 Open charging compartment on the controller, draw out Micro USB cable and connect to Supersonic Hero charging port. Ensure charging head in its connect contentation.

Pre Flight Check - things you should be aware of.

- What is not very a part. In or only in your board and interegal.

 What could, make the character in the company of the could be a fine of the could year in the could be a fine of the

A Sync Activate - Get Ready!

These controller is GP Footlon, Switch OM the power on the Supersonic Hero, New Ign will start to brief on Supersonic Hero Stating companions.

We shall see that the start of the Switch of Supersonic Hero Stating companions.

I will see that the start of the Switch of Switch

Care and Handling

- Do not put in water
 Do not modify any part of body or dis-assembly
 Tony use outdoors with addit supervision
 Do no throw, kick or apply excessive force to Body
 Do not fly around water or Trees
 Choking Hazard, Not for children under three years of age

energy and, not resisted and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on , the user is encouraged to try to correct the interference by one or more of the following measures;

Reorient or relocate the receiving antenna.

- Recoined or refocals the receiving antenna.
 Increase the separation between the equipment and receiver.
 Connect the equipment into an outlet on a circuit offlerent from that to which the receiver is connected.
 Conset the dealer or an experienced radio/TV technician for help.
 This device complete with Part 1s of the PCC Rules. Operation is subject to the following two conditions.
 This device complete your cause harmful interference, and 2. This device must

accept any interference received, including interference that may cause undesired operation. Caution, Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

- Supersonic Hero is equipped with a 2.4GHz extended range controller with capabilities of 200+ feet (60+ meters). If the range is exceeded, it will automatically shut off and land.

Maintenance

Normal Wear and Tear Supersonic Hero is made of compressed lightweight foam materials for superior RC Flying. Damage CAN and WILL occur to the foam from normal wear and/ or crashes during flights. If the foam parts of your hero cracks or breaks, repair is as easy as a piece of clear tape.

Replacing Propellers

- Supersionic Haro comise with a set of sparse proposers (int. and right), in the ever Centrity remove the broken propeller with a pair of place. Do not bend the ade. Propellers are marked "L" for Left or "R" for Right. Please ensure that you are using he correct one. Ensure that the flat side of this propeller is facing the motor. The mask should be instructed in the flat and of the propeller.
- Replace with spare propellers.

 Push the axie all the way through the propeller

Safety Tips WARNING: Suitable for Ages 12 and up. Do not touch the rotating propellers which may cause injury.

Supersonic Hero is equipped with a 2.4GHz extended range controller with capabilities of 200+ feet (60+ meters). If the range is exceeded, it will automatically shut off and land.

Troubleshooting		
Issues	Causes	Solutions
Supersonic Hero will not start. Supersonic Hero will not charge. Charging LED indicator is not blinking.	Supersonic Hero not charged Controller batteries are dirained. Supersonic Hero was not furmed off during charging. Controller was not set at CHA position during charging. Auto Off function engaged. Supersonic Hero and Controller are not synced.	Complete charge cycle. Replace controller batteries after about 5 charges. Always set the Supersonic Hero to CMA postion during charging. Always set the Controller in CMA postion during charging. Tim the Supersonic Hero On and Off to resot. Sync Activate again following step 4.
Lack of Flight Control	Controller batteries are drained. Controller is not turned on. It's a windy day.	Replace controller batteries after about 5 charges. Ensure controller switch is at the ON position, Strong winds will limit or eliminate your ability to control. Avoid flying in windy conditions.
Supersonic Hero flight is 'panned' too much to the left or right.	Imbalance in the propulsion of one or both the propellers.	 Adjust the trim dial in the opposite direction the Supersonic Hero is 'penned' to.
Damage to the foam body.	Normal wear or crashes during flights.	Apply minimal clear tape on damaged area. Do not apply too much clear tape as weight may impact flight.
Propeller breaks		A spare set is available. Please follow steps in maintenance section to replace.
LED indicator on Controller Green Light Flashing Red Light Flashing	Supersonic Hero and Controller not Sync. Controller batteries are low.	Sync Activate again following Step 4. Change batteries.
LED indicator on Supersonic Hero Red light flashing quickly Green light flashing slowly	Supersonic Hero and Controller are not Sync. Supersonic Hero battery is low.	Sync Activate again following Step 4. Charge Supersonic Hero .

We warrant this product to be free from defects in material and workmanship under use for a period of 300xys from the date of purchase. Should it become defects. 30 days warranty period, we will recommend to the control of the state of the

oy Tekk Corporation will pay for shipment of the repaired/replaced item back to you.

CHOKING HAZARDI Suitable for ages 14 and up due to small parts. Specification and color may vary from illustrations.
